### *Volume 20*

Physiology of Absciscic Acid and Related Substances, by F. T. Addicott and J. L. Lyon

Page 155, line 9: *for* increased *read* decreased.

### *Volume 21*

Gibberellins: Structure and Metabolism, by A. Lang

Page 545, Figure 3: in structural formula of copalyl pyrophosphate, symbol *should read*  $\text{P}_2$ .

Page 546, line 2 et seq. *should read*: The monoterpene pathway branches off from geraniol. Squalene and the sterols on the one hand, and the sesquiterpenoids (including absciscic acid) on the other, are derived from farnesol.
